SUMMARY

Computer Applications undergraduate interested in DevOps and Cloud Engineering. Currently learning AWS, Linux, Docker, Kubernetes, Terraform, Git, and CI/CD concepts through projects and self-study. Seeking an entry-level opportunity to build practical experience while contributing to cloud infrastructure and automation initiatives.

PROJECTS

Infrastructure as Code (IaC) with Terraform on AWS

- Automated the provisioning of an AWS EC2 instance using Terraform.
- Configured Apache HTTP Server using Terraform `user_data` to deploy a static web application.
- Managed cloud infrastructure using Infrastructure as Code (IaC) principles.
- Configured AWS Security Groups to enable HTTP access and verified successful deployment.

Deploying a Node.js Application on AWS EC2

Medium

Tech Stack: AWS EC2, IAM, Ubuntu Linux, Node.js, SSH, Linux, Security Groups

- Deployed a Node.js web application on an Amazon EC2 instance running Ubuntu Linux.
- Configured IAM users and established secure remote access to the EC2 instance using SSH.
- Set up the application environment by installing Node.js and managing configuration using environment variables (`.env`).
- Configured AWS Security Groups to allow inbound traffic and successfully hosted the application using the EC2 public IP address.

EDUCATION

Jaypee Institute of Information Technology, Noida

Jul 2023 – Jul 2026

Bachelor of Computer Applications (BCA)

TECHNICAL SKILLS

Cloud	AWS (EC2, VPC, IAM, S3, RDS, CloudWatch)
Containers	Docker, Kubernetes
CI/CD	Jenkins, Github Actions
Infrastructure as Code	Terraform, Ansible (Basics)
Operating Systems	Linux (Ubuntu), Windows
Version Control	Git, GitHub
Programming	Bash, Python
Networking	TCP/IP, DNS, HTTP/HTTPS, SSH

CERTIFICATIONS

Git & GitHub

Python

GoFr Summer of Code 2025
